

As of the end of 2014, the organizational structure of ROSSETI included:

- executive arm;
- Technical Supervision Center, a branch of ROSSETI (established in 2013 for independent technical supervision over electric grid facilities);
- Representative Office of ROSSETI in the Crimean Federal District.

The organizational structures of the ROSSETI Group's entities are built on linear functional lines, with functional verticals maintained from the management company to the production units of subsidiaries.
